Patent Cooperation Treaty Update
Declaration of Continuation by Uzbekistan

The United States Patent and Trademark Office has received notification from the World Intellectual Property Organization (WIPO) that Uzbekistan on Aug. 18, 1993, deposited a declaration the effect of which is that the PCT is applied by Uzbekistan. Consequently, nationals and residents of Uzbekistan are entitled to file international applications under the PCT, and Uzbekistan may be designated and elected in international applications. Moreover, the extension to Uzbekistan of the effects of each international application filed on or after Dec. 25, 1991 (the date on which the Soviet Union ceased to exist) and no later than Oct. 18, 1993, may be requested by the applicant concerned. That request must be filed with, and the prescribed fee must be paid to, the International Bureau of WIPO within three months from the date of its notification informing the applicant that a request for extension may be made. An applicant may also extend to Uzbekistan the effect of an international application wich was filed before Dec. 25, 1991, provided the application designated the Soviet Union and other conditions and procedures as prescribed by Uzbekistan are met.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
